## CERTIFICATE

This is to certify that K.Lalnuntluanga, LH.Lalrinfela and H.Ramnghakmawia has fully completed the project entitled,"Student Information Management System" in order to meet the requirement of the Mizoram University for the VI Semester Bachelor of Computer Application in the year 2021(january-june).It is to certify that all the corrections/suggestions indicated for internal assessment has been incorporated in the project.The project report has been approved as it satisfies the academic requirements in respects of the project work prescribed for the BCA Course.

Principal

# ACKNOWLEDGEMENT

With a sincere heart, we express our gratitude to all who have supported us in order to accomplish our project and make it a reality. We are obligated to say thanks to the following persons for their support and directions.

Firstly, we would like to give thanks to God for His guidance all throughout the processing period of our project. With a grateful heart we thank and acknowledge God, for without Him, we would not be able to accomplish the project of ours. He has given us the knowledge, wisdom and good health we needed for making this project into a reality.

We thank to our Principal Mr.Vuansanga Vanchhawng. We thank him for the support, encouragement and permission, which we enjoy freely in order to accomplish our project, and in this time of Pandemic situation.

Our heartfelt gratitude goes to Mr.H.Lalruatkima, Project Guide and Mr.K.Lalmuanpuia, Head of Department in Department of Computer Science, Higher and Technical Institute, Mizoram for their continual advice, backup, confidence, patience and their encouraging words which gives us courage and confidence without which we would be nowhere.

We thank all the people in the Department of Computer Science for being always available and helpful over the semester.

Last but not the least; we thank our parents for their moral support and encouragement.

**LH.LALRINFELA**

**H.RAMNGHAKMAWIA**

**K.LALNUNTLUANGA**

VI Semester BCA

Higher and Technical Institute, Mizoram

# ABSTRACT

The project report includes the description and implementation of “Student Information Management System” which deals with the management of student data by the user, which can be use in the windows. It also deals with maintaining student marks detail and their semester performances. To accomplish this, we used HTML, CSS and PHP as the front-end and My SQL as the back-end.

The Administrator (user) will save and update necessary information of student’s data and save it in the database,

This project is developed using HTML, CSS and PHP (for the frontend) and My SQL (for the backend) as the database system, which plays a vital role in this Project. The interface and the design of the website have been made in the simplest way for the better understanding of the users.

With the help of this Project, the management of student data can be easily done, and view from the website through online.

# DECLARATION

We do hereby that the project entitled “Student Information Management System” is not submitted to any other university or institution for the award of any degree, diploma of fellowship or published any time before. This project is prepared under the guidance of our project guide Mr. H.Lalruatkima which forms our partial fulfilment of the requirements for the three years Bachelor Degree in Computer Applications of Mizoram University.

# **1. INTRODUCTION**

## **CONTENT**

---

- 1.1 Overview of the project**
- 1.2 Objectives of the project**
- 1.3 Scope of the project**

# **STUDENT INFORMATION MANAGEMENT SYSTEM**

## **1. Introduction**

This project mainly focuses on Student Information Management System of HATIM college in which all the student data can manage in a proper manner and the user can manipulate the student data whenever it is needed, and also from this software the student marks and their performances can be checkout. This software is designed specifically for the student of HATIM and is not meant for mass production.

### **1.1 Overview of the project**

1. This software is designed to manage the student data.
2. It is designed to facilitate the problem of managing student data.
3. It is meant to be simple and user friendly.
4. It will record all the details of the student data and information of the alumni as well.

### **1.2 Objectives of the project**

The main objective of this project is to design and develop a simple and understandable Student Information management System. This will help in recording and checking student data easily instead of using pen and paper for managing student data and manipulating student data will be done easily and faster.

This project focus on the need of a better Student Information management System by making used of computer-based applications and database system. The objectives of the project are as follows:

- To provide easy and efficient student data for the user.
- To give faculty the opportunity to check the particular student data.
- To provide the performance of the student marks in each semester.
- To register every data of the student both current student and alumni.

# STUDENT INFORMATION MANAGEMENT SYSTEM

## 1.3 Scope of the project

The scope of the covers the necessary fields that are required steps for the Student Information Management System based application using HTML,CSS and PHP also a database system using My SQL.

The main Scope includes the following:

- A database system which consist of records of the necessary student data and information like login table, register table, etc. This database is connected to the website which can be updated, deleted from the application.
- Register page are for recording student data like personal information, university related information, academic performance, back paper information, semester result information and job-related information.
- Student view page consist of personal information, university related information, academic performance, back paper information, semester result information and job-related information.

## **2. SYSTEM ANALYSIS**

### **CONTENT**

---

**2.1 Hardware Requirements**

**2.2 Software Requirements**

# STUDENT INFORMATION MANAGEMENT SYSTEM

## 2.1 Hardware requirement

This project is designed in order to be used by the faculty and Head of Department. Hence, the hardware specification and requirements are not high. The basic configuration requires are as follows:

- Colored monitor.
- Processor-Pentium IV and above.
- RAM 256MB and above.
- Secondary memory (32GB and above) • QWERTY or IBM compatible keyboard.
- Optical mouse.

## 2.2 Software requirement specification

The software required for making the website and for designing the database are as follows.

- HTML,CSS and PHP
- My SQL.

## **3. SYSTEM DESIGN**

**3.3 Student View**

**3.4 About Us**

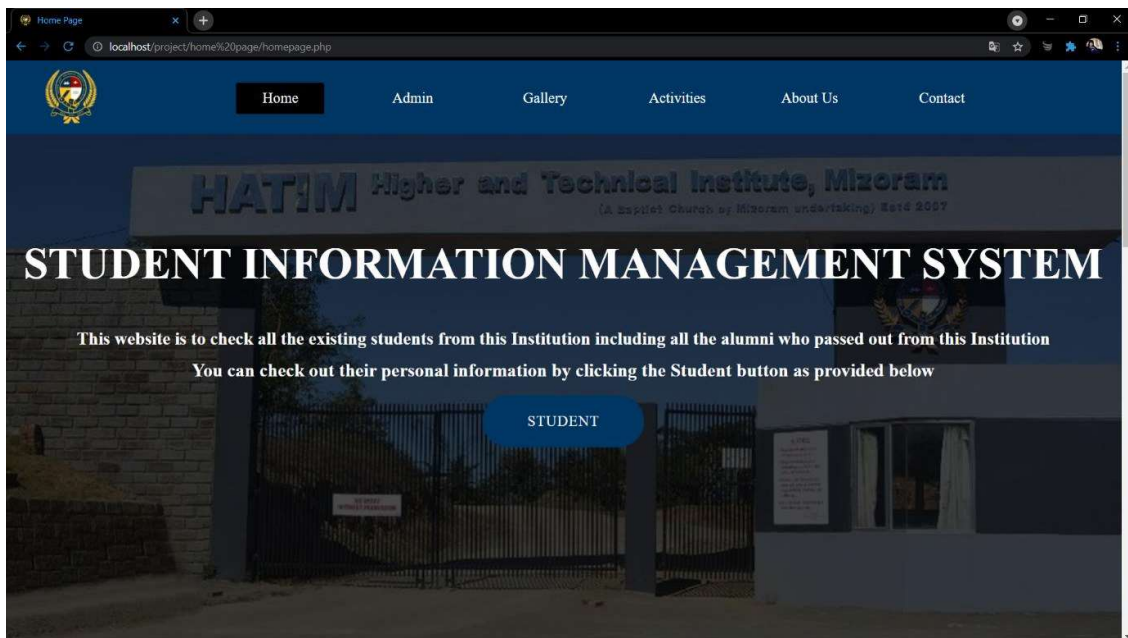

**3.5 Contact**

# STUDENT INFORMATION MANAGEMENT SYSTEM

## 3. SYSTEM DESIGN

**User Interface Design:** The Graphical User Interface of this project is created using php, html and css.

**3.1 Homepage:** This is the first page of our working window in the front-end. This page contained Admin, Student, About us and Contact. From this button we can access different page.

## STUDENT INFORMATION MANAGEMENT SYSTEM

**3.2 Admin:** This page will direct to login form where we can login to admin page. The page also contain the signup page for the login user.

**Login page:** This is the login page for the admin, as we can see the admin can access this login page by giving the requirement of username and password.

The image shows a login form for an admin user. It has a dark blue background. At the top, the word "Login" is written in a large, white, serif font. Below it, the label "Username" is written in a smaller, white, sans-serif font. Underneath the label is a white text input field with the placeholder text "username". Below the input field, the label "Password" is written in a smaller, white, sans-serif font. Underneath the label is a white text input field with the placeholder text "password". Below the password input field, there is a green rectangular button with the word "Login" written in white. At the bottom of the form, the text "Click to Signup" is written in a white, sans-serif font, and it is underlined.

## STUDENT INFORMATION MANAGEMENT SYSTEM

**Sign Up:** This is a sign up page where a user can make a username and password to login in admin page.

A screenshot of a web form titled "Signup" on a dark blue background. The form contains two input fields: "Username" and "Password". Below the "Password" field is a green "Signup" button. At the bottom of the form is a link that says "Click to Login".

[Click to Login](#)

## STUDENT INFORMATION MANAGEMENT SYSTEM

**Admin page:** This page will contain the dashboard, personal information tab, university-related information tab, academic performance tab, semester result tab, back paper-related information tab and job-related information tab where we can insert new student. Also a logout page to logout from the admin page and back to homepage.

**Dashboard:** In this page you can view the total student, current student and alumni. Also you can see the recently added student.

The screenshot shows the Admin Dashboard interface. On the left is a dark blue sidebar with the 'Admin' logo and a list of menu items: Dashboard, Personal Information, University Related Information, Academic Performance, Semester Result, Backpaper Related Information, Job Related Information, and Logout. The main content area has a light blue header with a 'Dashboard' title and a user profile for 'fella Super admin'. Below the header are three summary cards: '54 Current-student' with a person icon, '12 Alumni' with a graduation cap icon, and '32 Total Student' with a group of people icon. A 'Recently added Student' section follows, featuring a table with columns for Student Name, Father's Name, and Department. A 'See all' button is located to the right of the table.

Student Name	Father's Name	Department
UI/UX Desgin	UI Team	review
Web Development	Frontend	in progress
Ushop app	Mobile Team	pending
UI/UX Desgin	UI Team	review

# STUDENT INFORMATION MANAGEMENT SYSTEM

**Personal Information tab:** From this tab the user can register Personal Information of the student.

The screenshot shows a web browser window with the URL `localhost/project/login%20form/personal%20information/index.php`. The page has a dark blue sidebar on the left with the 'Admin' header and a menu containing: Dashboard, Personal Information (highlighted), University Related Information, Academic Performance, Semester Result, Backpaper Related Information, Job Related Information, and Logout. The main content area is titled 'PERSONAL INFORMATION' and contains the following form fields: Name, Father's Name, Mother's Name, Mobile, Date of Birth (with a calendar icon), Address, Email, Aadhar Number, Blood Group, and Gender (a dropdown menu with 'Select' as the current value). A black 'Submit' button is located at the bottom of the form.

**University-related Information tab:** From this tab the user can register university related information of the student.

The screenshot shows a web browser window with the URL `localhost/project/login%20form/university-related%20information/index.php`. The page has a dark blue sidebar on the left with the 'Admin' header and a menu containing: Dashboard, Personal Information, University Related Information (highlighted), Academic Performance, Semester Result, Backpaper Related Information, Job Related Information, and Logout. The main content area is titled 'University-Related Information' and contains the following form fields: Batch No., Year of Batch, Department (a dropdown menu with 'Select' as the current value), University Roll No., University Registration No., and Current Status (a dropdown menu with 'Select' as the current value). A blue 'Submit' button is located at the bottom of the form.

# STUDENT INFORMATION MANAGEMENT SYSTEM

**Academic Performance tab:** From this tab the user can record the student marks performance.

The screenshot shows a web browser window with the URL `localhost/project/login%20form/academic%20performance/index.php`. The page features a dark blue sidebar with the 'Admin' header and a list of navigation items: Dashboard, Personal Information, University Related Information, Academic Performance (highlighted), Semester Result, Backpaper Related Information, Job Related Information, and Logout. The main content area has a purple gradient background. A white form titled 'Academic Performance' is centered, containing input fields for 'Class X(Division)', 'Class XII(Division)', 'Class XII(Stream)', 'CGPA(%)', 'Division', and 'Rank'. A blue 'Submit' button is at the bottom of the form.

**Semester Result :** From this tab the user can register SGPA of the student.

The screenshot shows a web browser window with the URL `localhost/project/login%20form/semester-result/index.php`. The page features a dark blue sidebar with the 'Admin' header and a list of navigation items: Dashboard, Personal Information, University Related Information, Academic Performance, Semester Result (highlighted), Backpaper Related Information, Job Related Information, and Logout. The main content area has a purple gradient background. A white form titled 'Semester Results(CGPA%)' is centered, containing input fields for '1stsemester', '2ndsemester', '3rdsemester', '4thsemester', '5thsemester', and '6thsemester'. A blue 'Submit' button is at the bottom of the form.

# STUDENT INFORMATION MANAGEMENT SYSTEM

**Back-paper related Information tab:** From this tab the user can record back paper related information of the student

The screenshot shows a web browser window with the URL `localhost/project/login%20form/back-paper%20related%20information/index.php`. The page features a dark blue sidebar with the 'Admin' header and a list of navigation items: Dashboard, Personal Information, University Related Information, Academic Performance, Semester Result, Backpaper Related Information (highlighted), Job Related Information, and Logout. The main content area has a purple gradient background and contains a white form titled 'Back-paper related Information'. The form includes a 'Back-Paper Status' dropdown menu with 'Select' as the current option, followed by six text input fields labeled '1stsemester', '2ndsemester', '3rdsemester', '4thsemester', '5thsemester', and '6thsemester'. A blue 'Submit' button is located at the bottom right of the form.

**Job-related Information tab:** From this tab the user can record job related information from the alumni.

The screenshot shows a web browser window with the URL `localhost/project/login%20form/job-related%20information/index.php`. The page features a dark blue sidebar with the 'Admin' header and a list of navigation items: Dashboard, Personal Information, University Related Information, Academic Performance, Semester Result, Backpaper Related Information, Job Related Information (highlighted), and Logout. The main content area has a purple gradient background and contains a white form titled 'Job-related Information'. The form includes a 'Job Status' dropdown menu with 'Select' as the current option, followed by two text input fields labeled 'Job Details' and 'Remarks'. A blue 'Submit' button is located at the bottom right of the form.

## STUDENT INFORMATION MANAGEMENT SYSTEM

**3.3 Student View:** From this page you can view all the student details. Click more at the right corner to view the student's more details.

## 3.6 Database Design

The back-end of the project is created by using mysql database from hostlinger. A database is created first which consists of 7 different record or tables. These records store the necessary data and information in different fields according to the input of the user. The back-end is connected with the main website.

### 3.6.1 Database table layouts

The database table layouts for different tables are shown below:

The screenshot displays the phpMyAdmin interface for a MySQL database named 'u827763344\_root'. The left sidebar shows the database structure with a tree view containing 'information\_schema', 'u827763344\_root', and several tables: 'academic\_performance', 'backpaper', 'job', 'personal\_information', 'semester\_result', 'university\_related', and 'users'. The main panel shows the 'Structure' tab for the 'u827763344\_root' database. It lists 7 tables with their respective actions (Browse, Structure, Search, Insert, Empty, Drop) and engine details (InnoDB, utf8mb4\_general\_ci, utf8mb4\_unicode\_ci). The table 'users' is highlighted. Below the table list, there is a 'Create table' section with a 'Name' field and a 'Number of columns' field set to 4. The 'Console' tab is visible at the bottom.

Table	Action	Rows	Type	Collation	Size	Overhead
academic_performance	Browse Structure Search Insert Empty Drop	16	InnoDB	utf8mb4_general_ci	16.0 K	-
backpaper	Browse Structure Search Insert Empty Drop	16	InnoDB	utf8mb4_general_ci	16.0 K	-
job	Browse Structure Search Insert Empty Drop	16	InnoDB	utf8mb4_general_ci	16.0 K	-
personal_information	Browse Structure Search Insert Empty Drop	16	InnoDB	utf8mb4_unicode_ci	16.0 K	-
semester_result	Browse Structure Search Insert Empty Drop	16	InnoDB	utf8mb4_general_ci	16.0 K	-
university_related	Browse Structure Search Insert Empty Drop	16	InnoDB	utf8mb4_general_ci	16.0 K	-
users	Browse Structure Search Insert Empty Drop	2	InnoDB	utf8mb4_unicode_ci	16.0 K	-

Partitions: No partitioning defined.

Table 5: academic performance

# STUDENT INFORMATION MANAGEMENT SYSTEM

## Table Name- semester result

The screenshot shows the phpMyAdmin interface for the 'information\_schema' database. The 'Table structure' tab is selected for the 'semester\_result' table. The table has 7 columns: 'id' (int(11), PRIMARY), 'firstsemester' (decimal(10,2)), 'secondsemester' (decimal(10,2)), 'thirdsemester' (decimal(10,2)), 'fourthsemester' (decimal(10,2)), 'fifthsemester' (decimal(10,2)), and 'sixthsemester' (decimal(10,2)). All columns are unsigned and have a default value of 'None'. The 'id' column is the primary key. The 'Indexes' section shows a PRIMARY index on the 'id' column. The 'Partitions' section indicates 'No partitioning defined'.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
2	firstsemester	decimal(10,2)			No	None			Change Drop More
3	secondsemester	decimal(10,2)			No	None			Change Drop More
4	thirdsemester	decimal(10,2)			No	None			Change Drop More
5	fourthsemester	decimal(10,2)			No	None			Change Drop More
6	fifthsemester	decimal(10,2)			No	None			Change Drop More
7	sixthsemester	decimal(10,2)			No	None			Change Drop More

Table 6: semester result

## Table Name- back paper-related information

The screenshot shows the phpMyAdmin interface for the 'information\_schema' database. The 'Table structure' tab is selected for the 'backpaper' table. The table has 8 columns: 'id' (int(11), PRIMARY), 'backpaperstatus' (varchar(40)), '1stsemester' (varchar(40)), '2ndsemester' (varchar(40)), '3rdsemester' (varchar(40)), '4thsemester' (varchar(40)), '5thsemester' (varchar(40)), and '6thsemester' (varchar(40)). All columns are unsigned and have a default value of 'None'. The 'id' column is the primary key. The 'Indexes' section shows a PRIMARY index on the 'id' column. The 'Partitions' section indicates 'No partitioning defined'.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
2	backpaperstatus	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More
3	1stsemester	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More
4	2ndsemester	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More
5	3rdsemester	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More
6	4thsemester	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More
7	5thsemester	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More
8	6thsemester	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More

Table 7: back paper-related information

# STUDENT INFORMATION MANAGEMENT SYSTEM

## Table Name- Job-related information

The screenshot displays the phpMyAdmin interface for a MySQL database. The left sidebar shows the database structure, including 'information\_schema' and 'u827763344\_root'. The main panel shows the 'Table structure' for the 'job' table. The table has four columns: 'id' (int(11), PRIMARY, AUTO\_INCREMENT), 'jobstatus' (varchar(40)), 'jobdetails' (varchar(40)), and 'remarks' (varchar(1000)). The interface includes tabs for Table structure, Relation view, SQL, Search, Insert, Export, Import, Operations, and Triggers. Below the table structure, there are sections for Indexes, Partitions, and Information.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
2	jobstatus	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More
3	jobdetails	varchar(40)	utf8mb4_general_ci		No	None			Change Drop More
4	remarks	varchar(1000)	utf8mb4_general_ci		No	None			Change Drop More

Indexes

Action	Keyname	Type	Unique	Packed	Column	Cardinality	Collation	Null	Comment
PRIMARY		BTREE	Yes	No	id	14	A	No	

Partitions

No partitioning defined

Information

    background-color: #f44336;  
    cursor: pointer;  
}
```

### 5. TESTING AND IMPLEMENTATION

#### 5.1 Testing of the software

This software has undergone many series of tests, and errors present in the software have been dealt with. But there may be some unforeseen errors which are however unlikely. But the software will not crash as it has multiple exception cases. With the amount of time we have, we believe to have done a good job and as far as looks are concerned we are confident that our software has reached our expected mark.

#### 5.2 Possible problems

There are several problems present within the software; logical errors like trying to insert the word instead of the number, but exception message will pop up instead of crashing the system. Other problems may include the error caused when trying to use ' (semicolons) in inserting the student data.

# STUDENT INFORMATION MANAGEMENT SYSTEM

## 6. DRAWBACKS AND LIMITATION

This project is undertaken with careful analysis to meet the given criteria of this final project. Corrective measures have been taken. But our insufficiency of knowledge, skill and experience, this project definitely has its own limitations and drawbacks. It definitely cannot have a wide scope as found in other big projects due to the limitation of time. It is primarily a compilation of only what information we thought would be relevant to satisfy the basic requirements of the project.

The project cannot cover the management system of all the institutions as it requires much more time and effort which is not feasible looking at our current course duration. The information gathered are based on Higher And Technical Institute Mizoram, Lunglei and the details of the information gathered are very limited as this is our only source of information. The project is designed and carried out with this source and our base and the administration information of other institution are not included. Therefore, the management in this project offered may not be the same with other institution.

Also, manually entering the student information to the software form might take a long time (depending on the number of student). Addition of student information (other than the existing information on the form) is not possible.

# **STUDENT INFORMATION MANAGEMENT SYSTEM**

## **7. FUTURE ENHANCEMENT**

### **7.1 Future implementation and advantages**

As this is a computer-based application, looking at the rapid growth and development will increase and at the same time the need and creation of such a website will increase more and more. The website can be utilized better if it is maintained and updated properly. The database designed and structure can be enhanced and enlarged for recording more information and data. This type of website can be used for long period.

The increase usage and popularity of computer-based website will be a major advantage for the application of such a college/university system. The computerized revolution of many applications including the administration system will increase the need and implementation of maintaining the management in this level. This project is undertaken with the intentions of automation the traditional and futuristic outlook which requires a lot of time and efforts. This will be very useful tool for the office departments as it covers the main criteria for maintaining and managing all the necessary works in these fields. This project is design with the view of future implementation and enhancement as it is and application that would not be outdated easily even in the future

### **7.2 Upgrades**

As this project is carried out in a limited time and limit skill, there are many areas in which the software can be upgraded. The scope of the application can be extended to cover not only reservation systems for college/university also those private college and government college and university. The scope of the available management and documentation could also be enlarged if connected with multiple computers as networks. The database design can be enhanced and can be enlarge to create larger and bigger and more reliable database system and application. The design can be improving to covers more fields and more new options. It can be use more efficiently and more useful when upgraded and enhance better to widen the scope and application.

# STUDENT INFORMATION MANAGEMENT SYSTEM

## 8. CONCLUSION

This project is basically designed to be used for the college of HATIM. This chapter seeks to conclude the work that has been done, and to present the areas that mark to the completion of this project work.

This project work is the compilation of our ideas, views and thoughts. In doing this project and the development of our thoughts and ideas, we have benefited a great deal from our interaction with our teachers and friends. We extend our sincere thanks to them.

We are deeply conscious of the fact that this project would neither have been undertaken nor pursued and completed but for the tremendous support that we received from Mr. H. Lalruatkima, our project guide and K. Lalmuanpuia Head of Department, who undertook all the responsibilities ungrudgingly during this project work and encouraged in the preparation of this work.

We would like to place and record our sincere thanks and gratitude to our Principal, Mr. Vuansanga Vanchhawng, for extending his full support and consent to this project undertaken.

This project is done and presented in such a way that it can be manage the data and information for the operator efficiently and easily. This is a very painstaking work; however, we tried our best to satisfy the needs of this project. With much effort this project has come into being even though we are conscious of our limited knowledge and skill. But it would be our request that this project we have undertaken, be dealt with much consideration and acknowledgement.
